

New Hand and Handbed

9010 Hand simple

Due to customer feedback we have updated the existing simple hand with thicker joints. Thanks to this new version, the joints won't crack as easily as before. You can now choose between two models. To ensure a logical product numbering, we have changed the product number for the existing simple hand in rubber to 9010.G.

9010 Hand simple

Description: Simple entire right Hand, Radius, Ulna
Dimensions: Overall length: 448mm
Material: Solid foam
Fracture: Intact model
Remarks: Non flexible joints

9010.G, Hand simple, in rubber

Description: Simple entire right Hand, Radius, Ulna, covered with a thin layer of latex rubber
Dimensions: Overall length: 448mm
Material: Solid foam
Fracture: Intact model
Remarks: Non flexible joints

PR0511 Hand bed

This new Hand bed offers you a complete new way of working. The hand lays firmly on the foam which makes it much easier for you to work and to place the implant in the correct position. Should you ever drill accidentally into the foam, it will not wrap around the drill bit thanks to the new material. The hand bed is also reusable which makes it more economical for you.

PR0511 Hand bed

Description: Hand bed for dorsal access
Dimensions: 480 x 200 x 50/30 mm
Material: Foam
Remarks: Corresponds to hand models
